## SYNOPSIS OF PROJECTS

## PROJECT #1:

- Project Name:             Select*
- Team Size:                4
- Environment:              .NET, Amazon S3, Redshift, PostgreSQL
- Programming Languages:    C#
- Duration:                 April 2017 – till date

**Description:**

Select * utility is a .net console Job where data is pulled from Veeva SFA system on the basis of Metadata available in Amazon RedShift and store this data compressed format in Amazon S3 and also store the same data in Amazon RedShift PostgreSQL database.

**PROJECT #2:**

- Project Name: Ideation Portal
- Team Size: 10
- Environment: NodeJS and SQL Server
- Technologies Used: ReactJS and Bootstrap
- Duration: Feb 2020 – Current

**Description**:

Ideation Portal is an enriched user interface where employees post their ideas which will have a greater impact on the organization growth, running the business effectively as well. Discussions will happen on the posted ideas among the employees of different levels and the effective idea will be shortlisted to implement them.

**PROJECT #3:**

- Project Name: Gopetrans
- Team Size: 18
- Environment: .NET 4.5, SQL 2012
- Technologies Used: Google Maps API, Web API, Javascript, Jquery
- Duration: 2016 - 2017

**Description**:

Gopetrans is an Enterprise Application which focus on the Freight Forwarders. This application takes care of all the business of Freight Forwarders which includes Client Order, Carriers, Planning, Transportation and the invoicing features. Main advantage of this project is, it has auto-planner which is coupled with **Google Map**. This auto-planner enables users to plan the transportation using Google Map reducing the data entry time.

**PROJECT #4:**

- Project Name:            QuickSilver
- Team Size:               5
- Environment:             .NET 4.5, SQL 2012, ORACLE 11G
- Technologies Used:       MVVM Pattern, OBJECT RELATIONAL MODEL(ORM) and Web API
- Duration:                2014 - 2016

**Decription:**

QuickSilver is a Data-Driven Dynamic Framework which enables users to configure Web Pages. QuickSilver uses Object Relational Model(ORM) and MVVM Pattern to render the Web Pages dynamically. It consists of a Windows Application to configure the Activities and a Web Application to render those pages.

## SKILLS AND STRENGTHS

- Quick learner with good analytical and problem-solving skills, motivated to succeed with the desire to tackle challenging problems.
- An energetic and focused team player and leader with ability to build cohesive and productive teams.
- Strong interpersonal and communication skills with ability to maintain effective working relationships.
- A result-oriented person willing to relocate anywhere and prepared to work at any hour of the day.
- Flexible to work on any web technologies and programming languages with the cognitive skills.

**DECLARATION**        I honestly declare that all the above details are true to my knowledge.

Place: Chennai                                                                              **Annamalai K**
